Profile

I currently serve as the Assistant University Librarian for DeVry University. I'm responsible for training, operations and systems for 26 campus libraries across the country and in Canada. I have an undergraduate degree from Concordia University Irvine in elementary education and a master's degree from San Jose State University in Library and Information Science.

I teach several classes at CUI in the School of Business and Professional Studies. I have also taught in the School of Arts and Sciences at CUI and at Western Governor's University.

Teaching is one of the joys of my life. I especially love being the first instructor in the degree completion program!
